Optimized Graft-to-Endplate
Contact

Up to 94% more
graft volume
to promote greater
endplate contact*

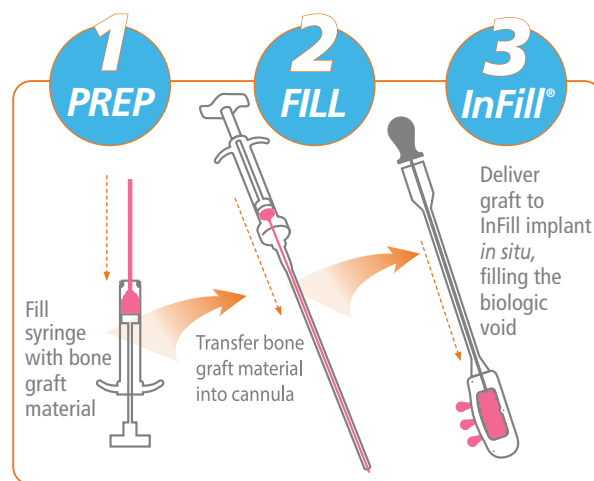

Fusion Is A Contact Sport™

InFill Interbody Fusion Systems

Intelligent, intuitive, patented spinal fusion technology with integrated *in situ* graft delivery.

- Engineered to deliver optimal bone graft volume, placement and graft-to-endplate contact
- Supports a complete post-fill, as well as a supplemental "topping off" of a pre-packed implant
- Featuring a broad array of unique implant designs and an innovative graft delivery system that sets a new standard for controlled *in situ* graft delivery

At Pinnacle Spine Group, we are committed to creating ground-breaking technologies for more effective spinal fusion outcomes. If you are too, we'd love to hear from you.
